Claims, 1, 16 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 6083377. Lin describes an electrochemical treatment step followed by a biochemical treatment step 32. Raw sewage is known to contain at least one organic compound and at least one nitrogen compound, e.g., nitrate. See Abstract.

Claims 1 – 16 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 7 of U.S. Patent No. 6,984,326. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to have performed the electrochemical treatment first and then the biological (biochemical) treatment step afterwards. This rejection may be overcome by filing a proper terminal disclaimer.

Claims 2 – 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 2, it is unclear whether the hypohalogenous acid, ozone, or active oxygen is generated in the electrolytic water, or whether the hypohalogenous acid, ozone, or active oxygen is generated during the course of the first treatment step. Furthermore, it is unclear whether the "hypohalogenous acid of a drug" is added to the electrolytic water, or whether the "hypohalogenous acid of a drug" is added to the water to be treated.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1724

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
